

HYFERET FAP

Fields of application:	Permanent handle imparting agent for filling and stiff finishes, for fleece and back stiffening of pile carpets additive for resin finishing
Composition:	Self-crosslinking synthetic dispersion
Appearance:	White, low viscous dispersion
Ionic state:	Non-polar
pH-value:	Approx. 3.5
Density (at 20 °C):	Approx. 1.0 g/cm ³
Viscosity (at 20 °C):	Below 30 mPa.s
Solubility:	In cold water by stirring
Stabilities:	Good compatibility with anionic and non-ionic finishes
Storage stability:	Approx. 12 months after delivery, if stored in the original
Storage conditions:	Store cool, but not below + 3 °C Cannot be used after exposure to frost
Packing:	Drum, container
